

NOTES:

NEW DUCT BANK CONCRETE ENCASEMENT SHOULD OVERLAP EXISTING ENCASEMENT, ESPECIALLY UNDERNEATH TO GIVE ADDITIONAL SHEER STRENGTH.

CONTRACTOR MAY ALSO USE A 4" SCHEDULE 40 PVC COUPLING WITH THE INSIDE BORED TO THE O.D. OF THE ORANGEBURG, OR HEAT THE COUPLING UP (GLUED TO THE END OF 4" SCHEDULE 60 TYPE DB DUCT) UNTIL IT IS SOFT ENOUGH TO BE SWEDGED OVER THE ORANGEBURG DUCT, WHEN COOL FASTEN IN PLACE USING AN ADHESIVE SEALANT TO PREVENT CONCRETE FROM PENETRATING.

IF TRANSITION REQUIRES ANY VARIATIONS TO THIS STANDARD, CONTACT UNIVERSITY OF MICHIGAN UTILITIES AND PLANT ENGINEERING ELECTRICAL SHOPS FOR APPROVAL 647-2044

ORANGEBURG TO PVC TRANSITION
