AGREEMENT FOR CONSTRUCTION MANAGEMENT SERVICES

THIS AGREEMENT FOR CONSTRUCTION MANAGEMENT SERVICES (the "Agreement") has been executed as of ______________________________ between THE REGENTS OF THE UNIVERSITY OF MICHIGAN, a Michigan constitutional corporation, having its principal office in Ann Arbor, Michigan (the "Owner"), and ________________________ a __________________________, having its principal office at ______________________________ ("Construction Manager").

The purpose of this Agreement is to establish the terms and conditions under which the Owner has agreed to purchase certain construction management services from the Construction Manager.

RECITALS

A. The Owner intends to develop and operate a Project on its campus (as described in the "Schedule of Project Details For CM Agreement", that is attached to, and incorporated by reference into, this Agreement and that is hereinafter referred to as "The Schedule of Project Details") and wishes to occupy the Project as soon as reasonably possible, all the while retaining high quality throughout and economy of costs.

B. The Project will be constructed on a "phased construction" basis, and if it is, those portions of the Contract Documents pertaining to phased construction shall be applicable. Otherwise, they shall not be.

C. The Owner has decided to retain the services of a Construction Manager to act on the Owner’s behalf and in the Owner’s best interest, and to assume certain risks, in connection with the development of the Project in accordance with the Owner’s goals.

D. The Construction Manager will not self-perform any of the Work. All Work will be performed by qualified Trade Contractors acting under the Construction Manager’s supervision.

E. The Construction Manager wishes to serve as construction manager for the Project and has represented that it is experienced in providing construction management services for projects of the size, complexity and nature of the Project and is willing to accept the risk allocation set forth in this Agreement.

F. The parties have executed this Agreement based upon the foregoing recitals.

The Owner and the Construction Manager agree as follows:

PART 1: INDUCEMENT; BASIC AGREEMENT

1.1 Inducement.

1.1.1 Inducement. To induce the Owner to execute this Agreement, the Construction Manager represents that:

1.1.1.1 All materials furnished to the Owner as part of the Owner’s construction manager selection process were, and remain, in all material respects true, correct and complete.

1.1.2 Except as provided in Section 2.17, the Work, to the extent Section 2.14 provides that certain responsibility for the design of the Project lies exclusively with the Design Professional, the Work required by the Contract Documents, including, without limitation, all construction details, construction means, methods, procedures and techniques necessary to manufacture will, at a minimum, conform strictly—(not substantially) with (i) good and sound practices
within the construction industry; (ii) generally prevailing and accepted industry standards applicable to the Work; and (iii) the requirements of any warranties applicable to the Work; and (iv) all Applicable Laws.

Agreement for Construction Management Services
Form Date: May 2005

1.1.3 (i) It is and will be financially solvent, able to pay all debts as they mature and possessed of sufficient working capital to perform all obligations under this Agreement; (ii) it has the resources, and it is and will remain, to the extent required by Applicable Laws, properly licensed to fulfill its obligations under this Agreement; (iii) it has and shall maintain throughout the term of this Agreement all federal, state and local licenses, permits and certificates necessary to perform this Agreement; (iv) it is authorized to do business in the State of Michigan; (v) its execution of this Agreement and its performance of it is within its duly authorized powers; (vi) its duly authorized representative has visited the Project Site and is familiar with the reasonably determinable and special conditions under which the Work is to be performed; and (vii) it possesses a high level of experience and expertise in the business administration, preconstruction, construction, construction management and supervision of projects of the scope, size, complexity and nature of the Project.

1.1.4 It (i) has carefully examined and understands this Agreement, (ii) has thoroughly investigated the reasonably determinable nature and locality of the Project Site and the conditions and difficulties under which the Work is to be performed (such as the cost and availability of labor, Applicable Laws (except as limited by Section 2.17), accessibility of the Project Site, and the availability of transportation), and (iii) enters into this Agreement on the basis of its own examination, investigation, and evaluation of all such matters and not in reliance upon any opinions or representations of the Owner, the Design Professional, or any of their respective officers, agents, servants, independent contractors, or employees, except as specifically set forth in the Contract Documents.

1.1.5 Each schedule it submits will set forth a reasonable time for completing the Work, and it will be able to cause the Work to be completed within that time, subject to extensions of time as may be granted in accordance with the Contract Documents.

1.1.6 If this Agreement includes a provision for liquidated damages, the Construction Manager shall not, on account of the liquidated damages provision, directly or indirectly or wholly or in part increase (or permit any increase in) the Cost of the Work, the Guaranteed Maximum Price, or any fee or compensation it may be entitled to receive beyond what would have otherwise been charged on account of the liquidated damages provision. It is the intention of the parties that risk of liquidated damages will be borne solely by the members of the Construction Team and that none of that risk will in any way be passed or charged back to the Owner; provided, however, that the Construction Manager shall not, by contract or otherwise, require any Trade Contractor to bear the risk or burden of liquidated damages except to the extent of that Trade Contractor’s responsibility for the delay giving rise to the imposition of liquidated damages.
Construction Manager’s liability under this Agreement, shall survive the Owner’s final acceptance of and payment for the Work and the termination of this Agreement for any reason whatsoever.

1.4 Agreement to Hire and Serve.

1.4.1 Agreement to Hire and Serve. The Owner hires the Construction Manager to perform the Services, and the Construction Manager accepts the Owner’s engagement and agrees to perform the Services. The relationship between the Owner and the Construction Manager shall be governed by this Agreement. The attached “General Conditions Applicable to Projects Where the Owner Has Retained the Services of a Construction Manager” (the “General Conditions”) are incorporated herein by reference.

1.5 Definitions.

1.5.1 Definitions. Terms used in this Agreement shall have the meanings ascribed to them in the General Conditions, unless the context clearly requires to the contrary.

1.6 Scope.

1.6.1 Scope. Subject to and in accordance with the terms of this Agreement, the Owner may at any time and from time to time increase or decrease the scope of the Project, and hence the scope of the Services and the Work.

1.7 Regental Approval. The Owner’s obligation to proceed and perform under this Agreement is subject always to the approval of its Board of Regents.

PART 2. THE DUTIES OF THE CONSTRUCTION MANAGER

2.1 Basic Duty.

2.1.1 Basic Duty. The Construction Manager shall for the Construction Cost (as defined in Section 8.1.12.10.1 below), and without additional cost to the Owner, provide the Services and cause the Work to be performed on a timely basis in accordance with the Contract Documents. Without limiting the generality of the foregoing, the Construction Manager shall be responsible for the performance and administration of all general conditions required for the Work, except as specifically allocated to the Owner under this Agreement.

2.2 Standard of Care.

2.2.1 Standard of Care. All Services to be performed by the Construction Manager shall be provided with the The Construction Manager agrees that it will (i) perform all Work and Services strictly in accordance with the requirements of the Contract Documents, and (ii) always act with that degree of care, skill and diligence usually exercised by and expected of first-rate, nationally-recognized construction managers experienced in projects similar to the Project in scope, size, complexity and nature.

The Construction Manager acknowledges that this Agreement establishes a mutual relationship of trust and confidence between it and the Owner, and the Construction Manager and the Owner accept this relationship, with the knowledge that the Construction Manager is an entity in which the Owner will place its trust and confidence. The Construction Manager acknowledges that the Owner is relying upon Construction Manager’s knowledge, skill and expertise as a first-rate, nationally-recognized construction manager experienced in projects similar to the Project in scope, size, complexity and nature.
The Construction Manager agrees to use its best efforts to efficiently and safely administer and supervise the Work, and to perform its Services and cause the Work to be completed to a high standard of quality and to be performed expeditiously and economically always consistent with the best interests of the Owner. The Construction Manager shall cooperate reasonably cooperate with the Owner, the Design Professional and the Owner’s other consultants and contractors in furthering the best interests of the Owner throughout the duration of this Agreement. The Owner shall cooperate reasonably with the Construction Manager and shall cause the Design Professional and its other consultants and contractors to reasonably cooperate with the Construction Manager, throughout the duration of this Agreement.

The Construction Manager shall furnish efficient business administration and management services.

The Services and the Work shall be performed only by qualified, competent personnel.

The Construction Manager shall ascertain that all documents it prepares are in accordance with Applicable Laws.

Except as otherwise provided in Section 2.17, Except to the extent Section 2.14 provides that certain responsibility for the design of the Project lies exclusively with the Design Professional, the Construction Manager shall perform all of its Services and shall cause all Work to be performed strictly in accordance with Applicable Laws to the satisfaction of the unit of government having jurisdiction.

Without limiting the generality of Section 2.3.2, the Construction Manager shall cause all members of the Construction Team to comply, at their own expense, with the provisions of all laws and regulations applicable to them as employers of labor or otherwise, and all licensing requirements pertaining to any professional status they or their employees, partners, associates, consultants and others directly or indirectly employed by them hold. The Construction Manager shall upon request deliver to the Owner copies of all licenses any members of the Construction Team hold.

If the Construction Manager performs any Services or permits any Work to be performed in a manner that it knows, or except as provided in Section 2.17, should have known, to be contrary to any Applicable Laws, the Construction Manager shall, without recovery from the Owner, under the Guaranteed Maximum Price, any contingency or otherwise, assume full responsibility and shall bear all attributable costs (including cost of correction and all fines and penalties).

The Construction Manager shall, upon request, furnish the Owner with copies of all documents prepared by in the possession of or available to the Construction Manager in any way pertaining to the Project, except internal memorandums or reports, privileged communications and documents with incidental references to the Work or documents which discuss multiple projects. The Construction Manager shall take appropriate action to ensure that all Trade Contracts, Subcontracts and Supply Contracts contain the same requirement.

At any time during the duration of this Agreement, upon the Owner’s request, the Construction Manager shall assist and support the Owner, at no additional charge to the Owner, in preparing for and attending meetings and presentations related to the Work.
2.6 Filing of Documents.

2.6.1 Filing of Documents. In addition to its obligation to secure permits, the Construction Manager shall assist the Owner and the Design Professional in connection with the filing of documents required to receive approvals from governmental authorities having jurisdiction over the Work.

2.7 Faults.

2.7.1 Faults. If the Construction Manager, the Design Professional or the Owner at any time observes or otherwise becomes aware of any fault or defect in the Work, or any nonconformance of the Work with the Contract Documents, it shall give prompt written notice to the others.

2.8 Self-Performance of Work.

2.8.1 Self-Performance of Work. The Construction Manager is hereby prohibited from bidding on or performing any portion of the Work.

2.9 Minutes.

2.9.1 Minutes. The Construction Manager shall keep minutes of all pre-bid and construction progress meetings and shall deliver them to all participants promptly after each such meeting. The Construction Manager shall promptly respond in writing to corrections in meeting minutes it receives from others.

2.10 Administrative Management Plans and Reports. The Construction Manager shall develop, for review and approval by the Owner, and then implement and maintain, a mission statement and plans, processes or reports to manage and organize each of the following aspects of the Work: document control, general management procedures, team building, traffic, parking, housekeeping, Project Site security, materials handling, diversity, Value Engineering, logistics and utilization, quality control, health and safety, emergency management, labor relations, a Work directory and such other plans as may be necessary for or appropriate to the proper administration of the Project (collectively the "Administrative Management Plans").

2.10.1 Throughout the term of this Agreement, the Construction Manager shall assist the Owner with systems analysis and engineering studies for the Work.

2.10.2 The quality control plan shall detail the specific measurable goals to be achieved by the Plan, identify the most cost effective manner in which to meet the quality control goals, and shall make recommendations to the Design Professional and Owner regarding the scope and magnitude of the testing program. It must include a list of all required testing, and shall be prepared in consultation with the Design Professional. The Construction Manager shall with the Design Professional prepare all needed requests for proposal for these testing needs and coordinate all testing activities. However, the Owner shall contract directly with the testing firms.

2.10.3 Materials Handling Plan. The Construction Manager shall develop and submit to the Owner for approval within twenty (20) days after the execution of the Agreement, a comprehensive materials handling plan. This plan shall take into consideration the following:

1. Maintaining the Construction Schedule.
2. Coordination with separate contractors.
3. The Owner’s operation of adjacent facilities.

4. Provisions for both vertical and horizontal transportation and utilization of material and personnel hoists.

5. Limitations and space available for storage.

6. Timing and sequencing the delivery of materials.

7. Requirements for handling and installation of large equipment.

2.10.4 Subject to the limits contained in Section 2.17, the Construction Manager will assemble a Value Engineering Team, consisting of the Construction Manager, the Design Professional, and the Owner to develop and implement a comprehensive Value Engineering program. Immediately upon its development, the Construction Manager will submit the proposed program to the Owner for its review and approval. The Value Engineering program will explore alternative solutions, systems, materials or techniques to achieve Work requirements economically. The Value Engineering program, to consist of such sessions as may be appropriate during each of the Design and bid-package phases of the work, will be for all major facility elements, both system and material. The Construction Manager will advise the Owner regarding costs and benefits of alternative building systems as well as prepare comparative analysis of alternative systems and finishes for the Owner’s consideration. The Value Engineering options approved by the Owner will be incorporated into the Contract Documents by the Design Professional.

2.10.5 The Construction Manager shall, in consultation with the Owner, develop parking, site access, and traffic plans. The parking and site access plans shall identify authorized parking locations and site access, including the routing of the vehicles of the members of the Construction Team during construction, and the Construction Manager shall organize the Work in relation to these plans.

2.10.5.1 It shall be the Construction Manager’s responsibility to provide and pay for all trades persons parking. To determine the availability of and arrange for parking on the Owner’s property, the Construction Manager shall contact the Owner’s Parking Services Office.

2.10.5.2 For routing of traffic on property other than the Owner’s, the Construction Manager shall contact the property owner or municipality or other agency having jurisdiction over such property for instructions. For parking on areas other than the Project site or the Owner’s property, the Construction Manager shall in consultation with the Owner’s Project Representative coordinate such use with property owners, the City of Ann Arbor or other agency(s) having jurisdiction, directed by the Owner.

2.10.5.3 Access to the Project site shall be restricted to such locations as are requirements:

2.10.6 The Construction Manager’s diversity plan shall comport with the following:

The Owner is committed to providing contract opportunities to businesses owned by women, minorities, and persons with disabilities. Through this commitment, the Owner works closely with its purchasing partners to ensure appropriate participation of minority, women and ADA businesses in the provision of goods and services to the Owner.

In support of this commitment, the Construction Manager agrees to insure that, in regard to any contract entered into pursuant to this Agreement, diversity business enterprises will be afforded full opportunity and will not be
discriminated against on the basis of race, color, gender, age, handicap, religion, ancestry, marital status, national origin, or place of birth. In recognition of this, the Construction Manager will take steps to insure maximum participation by qualified diversity businesses in a manner and to the degree that it takes such steps for its best customers.

The Construction Manager will be prepared to provide the information listed below when requested by the Owner. In addition, this information will be provided to and reviewed by the Owner prior to the award of bid contracts:

1. Identify firms from which prices and/or Trade Contract proposals were requested;
2. Identify firms from which prices and/or Trade Contract proposals were received;
3. Identify firms to whom trade contract work will be awarded or from whom materials will be ordered; and
4. Identify the steps taken to insure maximum opportunity for diversity business participation.

For purposes of this Diversity Plan, diversity businesses are those businesses qualifying as women-owned and minority-owned business enterprises and those businesses owned by persons with disabilities.

2.10.7 The Construction Manager shall provide the Owner with status reports on all of the Administrative Management Plans at such intervals as the Owner may reasonably determine.

2.11 [Intentionally omitted.]

2.12 Construction Cost.

2.10 Construction Cost.

2.10.1. “Construction Cost” means the Cost of the Work, plus the Construction Manager’s Fee, but in no event more than the Guaranteed Maximum Price.

2.10.2. The “Cost of the Work” means the reasonable and actual expenditures necessarily incurred by the Construction Manager in the proper performance of the Work, without markup. Such costs shall be at rates not higher than those customarily paid at the place of the Project except with prior consent of the Owner. The Cost of the Work shall include only the items identified in Sections 2.10.3 through 2.10.8 below:

2.10.3. The “Construction Manager’s Personnel Charges” which are the amounts to be paid to the Construction Manager as reimbursement for its supervisory and administrative personnel. The staffing of such personnel shall be in accordance with the Schedule of Project Details, as it may be amended from time to time with approval from the Owner. Subject to Section 2.10.3.1 below, the Construction Manager’s Personnel Charges shall be the lump sum amounts stated in the Schedule of Project Details, regardless of whether the actual cost is greater or less.

2.10.3.1. The Construction Manager will not be entitled to be paid for Construction Manager’s Personnel Charges in excess of the amounts set forth in the Schedule of Project Details, unless (i) the Construction Schedule as approved by the Owner shows a Date of Substantial Completion for the Work later than the date shown in the Schedule of Project Details, and such new date was due to
Owner changes, or (ii) there is a change in either (a) the scope of the Work pursuant to Article 9 of the General Conditions, or (b) the sequencing of Project elements, that requires additional staffing beyond that reflected in the Schedule of Project Details. In either such case, the parties will negotiate an appropriate adjustment to the Construction Manager's Personnel Charges. Or, at the option of the Owner, they will be calculated in the manner set forth in the succeeding paragraphs.

(a) Where an exception in Section 2.10.3.1 applies and the Owner wishes to utilize a calculation method, the "Construction Manager's Personnel Charges" shall be a lump sum based upon a cost per hour determined separately per Qualifying Employee, determined by calculating the "Base Hourly Rate" and the "Permitted Fringe Benefit Rate" in accordance with the following paragraph. "Qualifying Employees" are the Construction Manager's supervisory and administrative personnel listed in the Schedule of Project Details and any others later approved by the Owner.

(b) The "Base Hourly Rate" is the individual employee's base annual compensation plus applicable annual vehicle allowance divided by 2,080 (hours/year). To the Base Hourly Rate will be added the "Permitted Fringe Benefit Rate," which includes and is limited to social security taxes, unemployment taxes, health and welfare, retirement and workers compensation. The employee’s Base Hourly Rate shall be supported by such documentation as may be requested by the Owner, such as W-2 forms and the like. The foregoing Rates will be based on actual costs for the employee or, where customary and appropriate, standard costs, consistently applied, that are derived from reasonable apportionment or projection of actual costs. Bonus and other forms of Supplemental Compensation, if paid to employees, shall not be included in the Base Hourly Rate, but are already included in the Construction Manager's Fee, and the Construction Manager shall disclose the amount of any such bonus or supplemental compensation for each Qualifying Employee.

(c) The Base Hourly Rate and Permitted Fringe Benefit Rate applicable to a given employee, with supporting detail, shall be disclosed in writing and approved by the Owner before the Construction Manager is permitted to bill for the time of such employee. Increases in an employee's Base Hourly Rate or Permitted Fringe Benefit Rate require similar approval from the Owner.

(d) The lump sum Construction Manager’s personnel charges when the Owner wishes to use a calculation method shall be the sum of the products determined by multiplying the Base Hourly Rate and Permitted Fringe Benefit Rate applicable to each Qualifying Employee by the amount of hours each such employee is expected to work on the Project.

2.10.4. Trade Contract Costs consisting of payments made by the Construction Manager to Trade Contractors in accordance with the requirements of the Trade Contracts, including payment and performance bonds, if any.

2.10.5. Costs Of Materials And Equipment Incorporated In The Completed Construction consisting of:

1. Costs, including transportation, but less all available discounts, rebates, allowances and the like, of materials and equipment incorporated or, to the extent permitted by this Agreement, to be incorporated into the Work and included in the Guaranteed Maximum Price.

2. Costs of materials described in the preceding section in excess of those actually installed but required to provide reasonable allowance for waste and for spoilage that in any event shall not exceed what is considered a customary allowance. Unused excess materials, if any, shall be handed over to the Owner at the completion of the Work (or upon completion of the specific aspect of the Work, if spoilage or a decrease in the market value is a consideration) or, at the Owner’s option, shall be sold by the Construction Manager; amounts realized, if any, from such sales shall be credited to the Owner as a deduction from the Cost of the Work.
2.10.6. Costs Of Other Materials And Equipment, Temporary Facilities And Related Items
(General Conditions Items) consisting of:

1. Reasonable costs, including transportation, installation, maintenance, dismantling and removal of materials, supplies, temporary facilities, machinery, equipment, and hand tools not customarily owned by the construction workers, which are provided by the Construction Manager at the site and fully consumed in the performance of the Work; and cost less salvage value on such items not fully consumed, whether sold to others or retained by the Construction Manager. If there is salvage value, the Construction Manager shall use its best efforts to provide the Owner with a savings in the Cost of the Work by selling the items. If such items are retained by the Construction Manager, the Cost of the Work shall be reduced by fair market value of the item that has salvage value. Cost for items previously used by the Construction Manager shall mean fair market value.

2. Reasonable rental charges for temporary facilities, machinery, equipment, and hand tools not customarily owned by the construction workers, which are provided by the Construction Manager at the site, whether rented from the Construction Manager or others, and costs of transportation, installation, minor repairs and replacements, dismantling and removal thereof. Rates and quantities of equipment rented shall be subject to the Owner’s prior approval.

3. Reasonable costs of removal of debris from the site.

4. Reasonable reproduction costs, facsimile transmissions and long-distance telephone calls, postage and express delivery charges, telephone service at the site and reasonable petty cash expenses of the site office.

5. That portion of the reasonable travel and subsistence expenses of the Construction Manager’s personnel incurred while traveling away from the Project Site in discharge of duties connected with the Work, all of which must be pre-approved by the Owner.

6. That portion of reasonable premiums for insurance and bonds directly attributable to this Agreement. The Construction Manager’s insurance shall be invoiced at the rate set forth in the Schedule of Project Details.

7. Sales, use or similar taxes imposed by a governmental authority which are related to the Work and for which the Construction Manager is liable.

8. Fees and assessments for any permits, licenses and inspections for which the Construction Manager is required by the Contract Documents to pay (except those costs which arise as a result of the Construction Manager’s failure to proceed in accordance with the Standard of Care applicable to this Agreement or nonconforming Work, in which case, such costs shall be paid by Construction Manager and not reimbursed by the Owner as an element of the Cost of the Work).

9. Reasonable fees of testing laboratories for tests required by the Contract Documents, except those related to nonconforming Work.

10. Royalties and license fees paid with the prior written approval of the Owner for the use of a particular design, process or product required by the Contract Documents.

11. Technology costs as agreed between the Construction Manager and the Owner.

12. Legal expenses incurred in excess of those required for the Construction Manager to enter into this Agreement and perform its routine duties under it, but which are incurred solely for the benefit of the Project and are approved in advance by the Owner.
2.10.7. Other Costs incurred in the performance of the Work if and to the extent approved in advance by the Owner.

2.10.8. Emergencies and Repairs to Damaged Work, consisting of costs described above which are incurred by the Construction Manager in taking action to prevent threatened damage, injury or loss in case of an emergency affecting the safety of persons and property, as provided in this Agreement.

2.10.9. Costs Not To Be Reimbursed. The Cost of the Work shall not include:

1. Salaries and other compensation of the Construction Manager’s personnel stationed at the Construction Manager’s principal office or places other than the Project Site, except as specifically permitted in Sections 2.10.3 and 2.10.3.1 above.

2. Expenses of the Construction Manager’s principal office and offices at places other than the Project Site.

3. Overhead and general expenses.

4. The Construction Manager’s capital expenses, including interest on the Construction Manager’s capital employed for the Work.

5. Rental costs of machinery and equipment, except as specifically provided above in Section 2.10.6.2.

6. Costs due to the negligence of any member of the Construction Team or to the failure of the Construction Manager to fulfill responsibility to the Owner set forth in this Agreement. Costs incurred by any member of the Construction Team as a result of the negligence of any such parties or of anyone for whose acts any of them may be liable, including but not limited to, the costs of correction of defective or non-conforming Work, disposal of materials and equipment wrongly supplied, or making good any damage to property. (However, the costs described in this Section 2.10.9.6 may be paid out of available Construction Manager’s Contingency if (i) the cost did not result from the failure of the Construction Manager to abide by the Standard of Care assigned to it in this Agreement and (ii) the Construction Manager has not been able to recover the cost from the responsible party after using its best efforts, at its expense without reimbursement, and exhausting all available remedies.)

7. Any cost not specifically and expressly described above in Sections 2.10.3 through 2.10.8.

8. Costs which would cause the Guaranteed Maximum Price to be exceeded.

9. Losses and expenses sustained by any member of the Construction Team if such losses or expenses arise out of the infidelity or dishonesty on the part of one of their employees.

10. Losses and expenses not covered by insurance, if Construction Manager shall fail to obtain and/or maintain in effect the insurance required by the Contract Documents, and the insurance deductibles on the Construction Manager’s liability and worker’s compensation insurance.

11. Provided that the Owner has paid the Construction Manager all amounts then properly due and payable under this Agreement, the Cost of the Work shall not include any sums spent or costs incurred by the Construction Manager, or for which the Construction Manager is liable or obligated, in connection with any construction liens filed or served by any member of the Construction Team because of the Construction Manager’s failure or refusal to pay any such member, whether or not any such failure or refusal is wrongful or as a result of a bona fide dispute between the Construction Manager and any such member (provided that the Owner has paid the Construction Manager all amounts then properly due and payable under this Agreement).
2.10.10. The Owner, in consultation in accordance with Section 3.7, the Construction Manager, will develop an overall budget for the Project (the "Project Budget"). The Project Budget shall include an estimate of the Construction Costs, which shall be so identified. The Owner, in consultation with the Construction Manager, shall periodically prepare an estimated Construction Cost for the Project and present it in a form required by the Owner, that shall include the cost of total of those costs of construction, at current or projected market rates of labor and materials which are specified and selected or designed by the Design Professional and the compensation for the completed Project including fixed equipment to be furnished and/or installed by the Construction Manager or any member of the Construction Team, including reasonable allowance for the Construction Manager's fee. It shall also include a reasonable allowance for contingencies including market conditions at the time of bidding and for changes in the Work during construction but excluding: (a) the cost of moveable furniture and fixed equipment furnished and/or installed by parties other than the Construction Manager or any member of the Construction Team; (b) the cost of Work designed or specified by persons other than the Design Professional; (c) the fees and expenses of the Design Professional and Sub-consultants retained directly or indirectly by either the Design Professional or the Owner.

2.12.2 The estimated Construction Cost shall not include the cost of the land, rights-of-way, financing or other costs which are the responsibility of the Owner, but are a part of the Project Budget or the fees and expenses of the Design Professional and Sub-consultants retained directly or indirectly by either the Design Professional or the Owner.

2.10.11. A "Fixed Limit of Construction Cost" may be established by the Owner as a condition of this Agreement and shall be, as defined in the Design Professional's Agreement, is identified as such in the Schedule of Project Budget or an accompanying document. The Construction Manager, the Design Professional, and the Owner shall cooperate toward meeting the Owner's objective. The Fixed Limit of Construction Cost includes the Construction Manager's Contingency. Neither the estimated nor the final Construction Cost may exceed the Fixed Limit of Construction Cost without prior written approval of the Owner. The Construction Manager shall collaborate with the Design Professional during the design and bidding of the Project to achieve the objective of complete construction of the Project for a Construction Cost that does not exceed the Fixed Limit of Construction Cost. If, during the collaboration process, there is any indication the Construction Cost may exceed the Fixed Limit of Construction Cost, the Construction Manager shall consult and cooperate with the Design Professional in making recommendations to the Owner for corrective action toward meeting the Owner's requirement of having the Construction Cost be no greater than the Fixed Limit of Construction Cost.

2.10.12. The Guaranteed Maximum Price, determined in accordance with Part 7, shall not exceed the Fixed Limit of Construction Cost.

2.11 Consultants.

2.11.1 Consultants. To the extent deemed appropriate by the Owner, the Construction Manager shall assist the Owner and the Design Professional in selecting, retaining and coordinating the services of surveyors, special consultants and testing laboratories.

2.14 [Intentionally omitted.]

2.12 Claims Against Construction Manager.

2.12.1 Non-Owner Claims Against Construction Manager. The Construction Manager shall promptly notify the Owner of any claims threatened or asserted against the Construction Manager or any member of the Construction Team arising out of or in connection with the Project, the Work or the Contract Documents except those, if any, asserted by the Owner. The notification shall include as much specific information as is available about the claim, including without limitation, whether the claim
involves, or may involve, the Owner. It shall keep the Owner fully apprised of the status of any such claims. To the extent such claims are its responsibility under the Contract Documents, the Construction Manager shall without undue delay resolve all such claims in good faith at its sole expense and without additional recovery from the Owner by increase in the Guaranteed Maximum Price (but if the claim results from or arises out of or in connection with a breach of the standard of care set forth in Section 2.2 above, then without recovery from the Owner, under the Guaranteed Maximum Price, any contingency or otherwise). If any such claim involves, or might involve, the Owner, the Owner shall be involved in the process of resolving it or otherwise provided however that any claims that are not the result of the acts or omissions of the Construction Manager shall be eligible for reimbursement out of the Construction Manager’s contingency, if available, and in accordance with the provisions of Section 7.1.3.1.

2.13 Time is of the Essence.

2.13.1 Time is of the Essence—The Construction Manager will promptly perform its duties under the Contract Documents and will give the Work as much priority as is necessary to cause the Work to be completed on a timely basis in accordance with the Contract Documents. Time is of the essence of this Agreement. All Services and Work shall be performed strictly within (not substantially) the time limitations necessary to maintain the critical path and all deadlines established in the Master Design and Construction Project Schedule and the Baseline Construction Schedule.

2.13.2 All dates and periods of time set forth in the Contract Documents, including those for the commencement, prosecution, interim milestones, milestones, and completion of the Work, and for the delivery and installation of materials and equipment, were included because of their importance to the Owner.

2.13.3 The Construction Manager acknowledges and recognizes that (i) the Owner is entitled to full and beneficial occupancy and use of the completed Work following expiration of the Construction Time, and (ii) the Owner will schedule the opening of the Project based upon the Construction Manager’s achieving Substantial Completion of the Work at the time for Substantial Completion set forth in the Baseline Construction Schedule.

2.13.4 Except and only to the extent provided otherwise in Part G Article 7 of the General Conditions, by signing this Agreement, the Construction Manager agrees:

1. to bear the risk of delays to completion of the Work; and
2. that its compensation was established and this responsibility was accepted with full knowledge of this risk.

In agreeing to bear the risk of delays to completion of the Work, the Construction Manager understands that, except and only to the extent provided otherwise in Part G Article 7 of the General Conditions, the occurrence of events that delay the Work shall not excuse the Construction Manager from its obligation to achieve full completion of the Work within the Construction Time, and shall not entitle the Construction Manager to an adjustment of the Guaranteed Maximum Price.

2.13.5 The Construction Manager acknowledges that the Owner is purchasing the right to have the Construction Manager at the Project Site for the full duration of the Construction Time, even if the Work could be completed in less than the Construction Time.

2.14 Design Responsibilities.

2.17 Design Responsibilities—Among its other duties, the Design Professional is responsible to create the Design. Any errors, omissions, conflicts, ambiguities, violations of Applicable Laws, or other defects that are incorporated in the Design are the responsibility of the Design Professional. Notwithstanding anything contained in the Contract Documents to the contrary, the Construction Manager’s responsibility to the Owner with respect to its services under this Agreement, for its review of
the Drawings and Specifications, is limited to the following: (a) Defects the Construction Manager failed
to report to the Owner or the Design Professional promptly after Construction Manager actually
discovered them; or (b) Ambiguities, lack of clarity, inadequacy of detail, inconsistency, inaccuracy in the
Design documents, or their being incomplete or defects related to the constructibility of the Work, which the Construction Manager failed to discover or report to the Owner or Design Professional, but which a first-rate, nationally recognized construction manager experienced in projects similar to the Project in scope, size, complexity and nature would have discovered and reported given the time and opportunity for discovery that were actually available. If the conditions of (a) or (b) are met, and the Owner incurs loss or damage on account of the Construction Manager’s failure to discover or report the defect in a timely fashion, the Construction Manager will share an appropriate portion of the responsibility, notwithstanding the Design Professional’s primary responsibility for creating the defect. In no event, however, will the Construction Manager be responsible if the Design violates the Americans with Disabilities Act or similar state laws.

2.15 Assistance to the Owner.

2.15.1. Throughout the term of this Agreement, the Construction Manager shall assist the Owner
with systems analysis and engineering studies for the Work.

2.16 Improper Payments.

2.16.1. The Construction Manager shall neither solicit nor accept any kickback, or improper fee,
payment, or benefit of any kind in connection with the Project from anyone.

PART 3: SERVICES IN PREPARATION FOR CONSTRUCTION

3.1 Review and Evaluation of Design.

3.1.1 Preconstruction Meetings.

3.1.1.1 The Construction Manager and the Design Professional shall jointly schedule and attend regular meetings with the Owner to review and evaluate the Design. The Construction Manager shall, in consultation with the Design Professional, prepare a meeting schedule within five (5) days after execution of this Agreement, or issuance of a notice to proceed, whichever occurs first, and the first meeting shall be held not later than fourteen (14) days after execution of this Agreement, or issuance of a notice to proceed, whichever occurs first.

(a) Unless directed otherwise by the Owner, the Construction Manager shall provide the following items at the first meeting:

(b) An outline of the goals and objectives of the entire Work and the working relationship and responsibilities of the Owner, the Design Professional, and the Construction Manager, using this Agreement as a basis;

(c) A preliminary outline, with samples, of its Administrative Management Plans and Reports as required in Section 3.4 below;

(d) A preliminary evaluation of the Owner's Fixed Limit of Construction Cost and the program and Project Budget requirements provided by the Owner, each in terms of the other, within fourteen (14) days after receipt of them;
team meetings warrant the Construction Manager’s presence. Once agreed by the parties, and it shall attend and participate in all such meetings.

(e) 3.1.1.4 The Construction Manager shall prepare a preliminary site logistics and utilization plan for review by the Owner and implement the plan after the Owner has. This plan shall subsequently be refined by the Construction Manager with input from the Owner and Design Professional and approved by the Owner prior to its implementation; and

(f) A preliminary Project Schedule in accordance with Section 3.6, using actual current project data that will fully demonstrate the Construction Manager’s intended scheduling program, online access and reports.

3.2 Review and Evaluation of Design.

3.1.2 Taking into account the Fixed Limit of Construction Cost, the Construction Manager shall consult with the Owner and the Design Professional and give advice concerning site use and improvements, cost, scheduling, selection of materials, building systems, equipment and methods of Project delivery. When appropriate, the Construction Manager shall propose and review with the Owner and the Design Professional alternative approaches to the Design and construction of the Work and shall disclose any potential adverse effects created by the alternatives, including items affecting the budget, quality, schedule, labor or safety of the Project.

3.1.3 The Construction Manager shall review the constructibility of the Design following the completion of each set of schematic design documents, design development documents and Contract Documents to identify areas of conflict, omission and overlap in the Work to be performed by the Trade Contractors, recommend alternative solutions (Members of the Construction Team, and, whenever the Design details adversely affect construction feasibility, budgets or schedules), recommend alternative solutions for approval by the Owner and the Design Professional. The Construction Manager shall provide recommendations concerning the relative feasibility of construction methods, availability of materials and labor, and time requirements for procurement, installation and construction.

1 3.1.3.1 The Construction Manager shall review all Design documents for ambiguity, clarity, adequacy of detail, consistency, accuracy, completeness and costing and scheduling.

2 3.1.3.2 The Construction Manager shall perform Value Engineering. The Construction Manager shall provide and estimates of cost for the program of requirements based upon the current conceptual designs prepared by the Design Professional.

3 3.1.3.3 If the Project will be constructed on a phased construction basis, the Construction Manager shall make recommendations to the Owner and Design Professional regarding the phased issuance of Drawings and Specifications to facilitate phased construction of the Work.

3.2.1 3.1.4 The Construction Manager shall as often as appropriate (i) make recommendations concerning construction methods, the need for additional studies or tests, the availability and effective use of materials and labor, time requirements for procurement, installation and construction, and factors related to cost, including, but not limited to, cost over useful life and comparative cost of operation, cost of alternative designs or materials, preliminary budgets, and possible economies; (ii) provide recommendations regarding assignment of responsibilities for prepared safety programs, temporary project facilities, equipment, materials and services for common use of Trade Contractors; members of the Construction Team; and (iii) verify that such requirements and assignment of responsibilities are included in the proposed Contract Documents.
3.2.3. Subject to the limits contained in Section 2.17 (Design Responsibilities), except to the extent Section 2.14 provides that certain responsibility for the design of the Project lies exclusively with the Design Professional for the Project, the Construction Manager shall bear an appropriate portion of the responsibility for any materially adverse impact on the Work resulting from its failure to notify the Owner and Design Professional in writing of flaws in or conflicts among the Drawings, Specifications, submittals and any Applicable Laws that it discovers or should have discovered with the exercise of appropriate diligence.

3.2 Schedules; Target Completion Date. The Construction Manager shall develop the schedules described in Section 3.2.1-3.2.5 below.

3.3 Bid Packages; Labor Requirements.

3.3.1. A "Construction Bid Package List" shall be submitted by the Construction Manager to the Owner and Design Professional for their review and comment within thirty (30) days of the execution of the Agreement or the issuance of a Notice to Proceed, whichever occurs first. This list shall itemize the desired trade bid packages and corresponding divisions of work in order to allow the Design Professional to organize and manage staffing so as to produce design documents in a timely manner. Any revision to the Construction Bid Package List shall be submitted to the Owner for review and comment. Likewise, the method and procedures to be used for selecting Trade Contractors and Suppliers and awarding contracts shall be submitted to the Owner for review and comment. The Construction Manager shall provide an estimate of the number and categories of bid packages that will be appropriate to complete the Work and an analysis of the types and quantities of labor required for the Project and shall review the availability of appropriate categories of labor required for critical phases. In conjunction with the preparation of the Construction Bid Package List, and thereafter whenever appropriate, the Construction Manager shall at no additional cost to the Owner minimize any potential adverse effects of labor shortages, such as by utilizing planned/scheduled overtime and/or shift work when necessary.

3.4 Administrative Management Plans.

3.4.1. Within thirty (30) days following the first preconstruction meeting, the Construction Manager shall develop and submit to the Owner for review and comment a set of administrative management plans for the Project ("Administrative Management Plans"). The Administrative Management Plans shall include plans, processes and sample reports to manage and organize each of the following aspects of the Work: bidding, awarding, budget control, testing, quality control, schedule control, document control, general management, traffic routing, parking, housekeeping, Project Site security, materials handling, diversity, Value Engineering, logistics and utilization, emergency management, labor relations, a Work directory, and such other plans as may be necessary or appropriate for the proper administration of the Project. The Administrative Management Plans shall be updated and resubmitted to the Owner by the Construction Manager as changes occur or additional information is required. During the construction period, the Construction Manager shall implement and maintain the Administrative Management Plans.

3.4.2. Quality Control (QC) Plan.

1. The Construction Manager shall include in its Administrative Management Plans a preliminary QC plan to the Owner for review and comment. Construction will be permitted to begin only after Owner acceptance of the QC plan, or approval of that portion of the plan applicable to the particular feature of Work to be started. The QC plan that the Construction Manager proposes to implement shall identify the personnel, procedures, instructions, records, forms and, at a minimum, shall include:

(a) A description of the quality control program;

(b) Procedures for processing Shop Drawings, samples, certificates, and other submittals;
(c) QC activities to be performed, including those of Trade Contractors, Subcontractors, offsite fabricators, and Suppliers;

(d) Control testing procedures to include notification of tests, participants, recording of test results, and distribution of test reports; and

(e) Preparation and revision procedure for each component of the Administrative Management Plans.

2. After approval of the QC plan, the Construction Manager shall notify the Owner in writing of any proposed change to its QC program.

3. Control. The Construction Manager’s QC program shall include at least the following two phases of control and follow-up management for definable features of Work:

(a) Preparatory meeting—this control phase shall be performed before beginning Work on each definable feature of Work. It shall include a review of contract requirements to assure that materials, sample panels, and equipment conform to contract requirements, and that control testing, including procedures, are finalized. This control phase shall also include an examination of the Project Site to verify that it conforms to contract requirements, and a determination that required materials are on hand and properly stored. The Owner shall be notified at least forty-eight (48) hours in advance of each preparatory meeting.

(b) Management—the follow-up management phase shall be performed continuously to verify that control procedures are providing an end product that complies with contract requirements. Adjustments to control procedures may be required based upon the results of this phase and control testing.

4. Tests. The Construction Manager is responsible for tests specified or required to verify that control measures are adequate to provide a product that conforms to the contract requirements of the Contract Documents. A list of such tests which the Construction Manager is required to perform, and tests that require third party firms, shall be furnished to the Owner with the QC plan. The list shall give the test name, a specification paragraph containing the test requirements, and the Construction Manager’s personnel or list of potential third party firms that will be responsible for each type of test. The Construction Manager shall perform the following activities and record and provide the following data:

(a) Prior to each test, submit to the Design Professional and the Owner the testing procedures that comply with contract requirements;

(b) Verify that facilities and testing equipment are available and comply with testing standards;

(c) Check test instrument calibration data against certified standards;

(d) Verify that recording forms, including all of the test documentation requirements, have been prepared, and

(e) Provide all necessary equipment, utilities, material, data and personnel for each test for which the Construction Manager is responsible.

5. For tests requiring third party testing firms, the Construction Manager shall, with the Design Professional, prepare all needed requests for proposal for these testing needs and coordinate all testing activities. However, the Owner shall contract directly with the testing firms.
6. The QC plan shall detail the specific measurable goals to be achieved by the Plan, identify the most cost effective manner in which to meet the quality control goals, and shall make recommendations to the Design Professional and the Owner regarding the scope and magnitude of the testing program.

7. The Construction Manager shall maintain a quality control log to track quality issues as they are identified. The log should track the date items are identified, corrected, and Trade Contractor responsibility.

3.4.3. Materials Handling Plan.

1. The Construction Manager shall develop and submit a preliminary materials handling plan. This plan shall include in the Administrative Management Plans the following:

- (a) Maintaining the Construction Schedule.
- (b) Coordination with separate contractors.
- (c) The Owner’s operation of adjacent facilities.
- (d) Provisions for both vertical and horizontal transportation and utilization of material and personnel hoists.
- (e) Limitations and space available for storage.
- (f) Timing and sequencing the delivery of materials.
- (g) Requirements for handling and installation of large equipment.

3.4.4. Parking, Traffic Routing and Site Access Plan

1. The Construction Manager shall provide to the Owner for review and comment a parking, site access and traffic routing plan for the Project. This plan shall be finalized in consultation with the Owner, identifying authorized parking locations and site access, including the routing of the vehicles of the members of the Construction Team during construction, and the Construction Manager shall organize the Work in relation to these plans.

- (a) It shall be the Construction Manager’s responsibility to provide and pay for all trades persons’ parking. To determine the availability of and arrange for parking on the Owner’s property, the Construction Manager shall contact the Owner.

- (b) For routing of traffic on property other than the Owner’s, the Construction Manager shall contact the property owner or municipality or other agency having jurisdiction over such property for instructions. For parking on areas other than the Project site or the Owner’s property, the Construction Manager shall, in consultation with the Owner’s Project Representative, coordinate such use with property owners, the City of Ann Arbor or other agency(s) having jurisdiction.

- (c) Access to the Project site shall be restricted to such locations as are directed by the Owner.
3.4.5. Diversity Plan

1. The Construction Manager shall include in the Administrative Management Plans a diversity plan that complies with the following requirements:

   (a) The Owner is committed to providing contract opportunities to businesses owned by women, minorities, and persons with disabilities. Through this commitment, the Owner works closely with its purchasing partners to ensure appropriate participation of minority, women and ADA businesses in the provision of goods and services to the Owner.

   (b) In support of this commitment, the Construction Manager agrees to ensure that, with regard to any contract entered into pursuant to this Agreement, diversity business enterprises will be afforded full opportunity and will not be discriminated against on the basis of race, color, gender, age, handicap, religion, ancestry, marital status, sexual orientation, national original or place of birth. In recognition of this, the Construction Manager will take steps to ensure maximum participation by qualified diversity businesses in a manner and to the degree that it takes such steps for its best customers.

   (c) The Construction Manager shall provide the information listed below when requested by the Owner. This information will be provided to and reviewed by the Owner prior to the award of bid contracts:

      (i) Identify firms from which prices and/or Trade Contract proposals were requested;

      (ii) Identify firms from which prices and/or Trade Contract proposals were received;

      (iii) Identify firms to whom trade contract work will be awarded or from whom materials will be ordered; and

      (iv) Identify the steps taken to ensure maximum opportunity for diversity business participation.

2. For purposes of this Diversity Plan, diversity businesses are those businesses qualifying as women-owned and minority-owned business enterprises and those businesses owned by persons with disabilities.

3.4.6. Preparation for Construction

1. The Construction Manager shall in preparation for construction perform all appropriate services described in Article 6 of the General Conditions which pertains to Trade Contractors.

3.5 Value Engineering Program

3.5.1. The Construction Manager shall assemble a Value Engineering Team, consisting of the Construction Manager, the Design Professional, and the Owner to develop and implement a comprehensive Value Engineering program. Immediately upon its development, the Construction Manager will submit the proposed program to the Owner for its review and approval. The Value Engineering program will explore alternative solutions, systems, materials or techniques to achieve Work requirements economically. The Value Engineering program, to consist of such sessions as may be appropriate during each of the Design and bid-package phases of the work, will address all major facility elements, both system and material. As part of the Value Engineering program, the Construction Manager will advise the Owner regarding costs and benefits of alternative building systems as well as prepare comparative analyses of alternative systems and finishes for the Owner’s consideration. The
Value Engineering options approved by the Owner will be incorporated into the Contract Documents by the Design Professional.

3.6 Schedules.

3.2.1 Master Design and Construction Project Schedule. Taking into account the Owner’s desired occupancy date, as soon as practical, and not later than thirty (30) days after execution of this Agreement or issuance of a notice to proceed, whichever occurs first, the Construction Manager shall use its best efforts, given a sufficient amount of information (the need for which the Construction Manager shall identify in advance), to develop and provide in an electronic format reasonably satisfactory to the Owner a Master Design and Construction Schedule for the Design Professional’s review and the Owner’s approval. The Master Design and Construction Schedule shall coordinate and integrate the Construction Manager’s Services, the Design Professional’s services, and the Owner’s responsibilities through the Schematic Design, Design Development and Construction Document phases. The Project Schedule shall include a preliminary construction schedule and identify the required construction bid packages. The Construction Manager shall obtain the Design Professional’s approval of that portion relating to the performance of the Design Professional’s services. The Master Design and Construction Schedule shall identify the required construction bid packages necessary to facilitate phased construction services. As Design proceeds, the Master Design and Construction Schedule shall be refined (made more detailed) in consultation with the Owner and Design Professional, as often as necessary, but at least monthly, to reflect the evolution of the Design, the Work, and other relevant factors, including, when they become available, proposed activity sequences and durations (including site Work, fabrication and installation of systems, testing, start-up and commissioning activities), Milestone Dates for receipt and approval of pertinent information, preparation and processing of shop drawings and samples, procurement and delivery of materials and equipment, the Owner’s occupancy requirements and priority, the proposed date of Substantial Completion, and other relevant information. The Master Design and Construction Schedule shall also be updated upon completion of the Design associated with each construction bid package in order to inform interested bidders of the required schedule. Each updated Master Design and Construction Schedule shall be presented to the Owner for approval. If any Master Design and Construction Schedule update suggests that previously approved schedules may not be met, the Construction Manager shall promptly make appropriate recommendations to the Owner and the Design Professional.

3.2.2 Construction Bid Schedule. Not later than thirty (30) days after execution of this Agreement or issuance of a notice to proceed, whichever occurs first, the Construction Manager shall produce a “Construction Bid Schedule” listing desired trade bid packages and corresponding divisions of work in order to allow the Design Professional to organize and manage staffing so as to produce design documents in a timely manner.

3.2.3 [Intentionally omitted.]

3.2.4 Bid Package Construction Schedule. The Construction Manager shall provide for the Owner’s approval and the Design Professional’s concurrence an appropriate “Bid Package Construction Schedule” listing desired trade bid packages and corresponding divisions of work in order to allow the Owner to organize and manage staffing so as to produce design documents in a timely manner.

3.2.5 Materials Purchasing. As part of its preparation of the Project Schedule, the Construction Manager shall investigate and recommend a schedule for the Owner’s purchase of materials and/or equipment which shall constitute part of the Work, including materials and/or equipment requiring long lead time procurement, and which are to be purchased or completed by the Owner. The Construction Manager shall coordinate this schedule with the early preparation of portions of the Contract Documents by the Design Professional.

1 3.2.5.1 The Construction Manager shall provide the Owner with a written report, including a CCCS, detailing procurement requirements for long lead time materials and equipment.

Form Date: 1/31/2014
to be included in the Work and projected dates by which arrangements for purchasing such materials and
equipment should be completed. The Construction Manager shall expedite and coordinate its purchase
and delivery of long lead time items. 3.2.5.1.1 The Construction Manager shall identify qualified
manufacturers for long lead time items and bid out materials to approved manufacturers (or if requested
by the Owner, negotiate with manufacturers) in order to meet the requirements of the Master Design and
Construction Schedule. The Construction Manager shall monitor manufacturers for production
timetables and performance testing to ensure complete compliance with the requirements of the
Contract Documents. The Construction Manager shall expedite and coordinate its purchase and
delivery of long lead time items.

3.2.6 Target Date for Substantial Completion. The parties acknowledge the Owner's
goal of achieving Substantial Completion of the Work by the date set forth in The Schedule of Project
Details. A preliminary date of Substantial Completion shall be set forth in the Master Design and
Construction Schedule. However, the date of Substantial Completion to which the Construction
Manager will be held accountable will be that date set forth in the Baseline Construction Schedule, as
that schedule may be adjusted in accordance with the Agreement.

3.3 Bid Packages; Labor Requirements. The Construction Manager shall advise the
Owner on the separation of the Work into bid packages and contracts for the various categories of
Work, and shall advise on the method to be used for selecting Trade Contractors and Suppliers and
awarding contracts. The Construction Manager shall provide an estimate of the number and
categories of bid packages that will be appropriate to complete the Work and an analysis of the
types and quantities of labor required for the Project and shall review the availability of appropriate
categories of labor required for critical phases. The Construction Manager shall make
recommendations for actions designed to minimize adverse effects of labor shortages, including
planned/scheduled overtime and or/shift work if necessary.

3.6.2 3.3.1 The Construction Schedule. Prior to the release of the first bid package, the
Construction Manager shall in preparation for construction perform all appropriate services described in
Part F present to the Owner for approval a Construction Schedule in the form required by Section 4.9 of
the General Conditions, which pertains to Trade Contractors and Suppliers. The Construction Schedule
shall be the schedule utilized by the Construction Manager for the duration of the Project and upon which
the Guaranteed Maximum Price shall be based, as set forth in Section 7.2.

3.7 Preliminary Cost Projections Estimates.

3.4.1 (Intentionally omitted.)
3.4.2 Within forty-five (45) twenty one (21) days after the Design Professional has
prepared and receipt of the Owner has approved final schematic design documents, or prior to submittal
of any bid release recommendation, whichever is earlier, the Construction Manager shall prepare, for the
Design Professional's review and the Owner's approval, a fully comprehensive cost projection,
which's approval, an estimate of the Construction cost of the project, including a completed Construction
Cost Control Summary ("CCCS"), a sample of which is attached to the Schedule of Project Details as
Exhibit A. The CCCS shall include supporting data. During When requested by the Owner or the Design
Professional, during the preparation of the design development documents, the Construction Manager
shall update and refine this projection at appropriate intervals.
3.7.3. When Construction Documents Upon notification by the Owner or Design Professional (orally or in writing) that the construction documents are ninety-five percent (95%) complete if a Guaranteed Maximum Price has not then been established, the Construction Manager shall again revise the cost projection estimate for each bid package category and shall deliver a copy for approval to the Owner and the Design Professional, together with supporting data within twenty-one (21) days.

3.7.4. If any projection estimate submitted to the Owner exceeds previously approved projections or the Fixed Limit of Construction Cost, the Construction Manager shall, without increase in the Guaranteed Maximum Price additional cost to the Owner, within twenty-one (21) days make recommendations to the Owner and the Design Professional as to how the Work can be completed within the Owner's budget Fixed Limit of Construction Cost.

3.7.5. All cost projection estimates shall be made in good faith and shall have a reasonable basis. All cost projection estimates shall, where the concepts are applicable, provide quantities and unit prices for each item of Work.

3.7.6. If the Fixed Limit of Construction Cost is exceeded by either the latest Construction Manager and Design Professional reconciled estimates or the lowest bona fide bids when they become known, or both, the Owner may, at its option and at any time, elect to do any one or more of the following:

1. Cooperate with the Design Professional and the Construction Manager in revising the scope and quality of the Project as required to reduce the probable Construction Costs for the Project to within the limits of the Fixed Limit of Construction Cost;

2. Authorize rebidding within a reasonable time;

3. Give written approval of an increase in the Fixed Limit of Construction Cost or Guaranteed Maximum Price;

4. Suspend or terminate the Project.

3.7.7. When Section 3.7.6 is elected:

1. If the Owner elects to proceed under Section 3.7.6.1 above, the Design Professional shall modify the Contract Documents as necessary to bring the Construction Costs within the Fixed Limit of Construction Cost without additional cost to the Owner, and the Construction Manager's Lump Sum Pre-construction and Construction Personnel and Fee shall not be adjusted.

2. If the Owner elects to authorize rebidding or to suspend or terminate the Project, the Construction Manager shall take all appropriate action to assist the Owner at no additional cost to the Owner.
If the Owner decides to increase funding partially or wholly to adjust for estimates or bids greater than the Fixed Limit of Construction Cost, as provided in Section 3.7.6.3 above, the Construction Manager’s Lump Sum pre-construction and construction personnel charges and fee shall not be increased.

3.5 Pre-Purchases; Construction or Installation Procedures.

3.7.8.3.5.1 The Construction Manager accepts assignment of, and liability for, all existing purchase orders and other agreements for procurement of materials and equipment that are identified as part of the Contract Documents and have been provided to it prior to the execution of the Agreement. The Construction Manager shall be responsible for such pre-purchased or direct-purchased items, if any, as if the Construction Manager were the original purchaser. If feasible, the Construction Manager shall promptly inspect all pre-purchased or direct-purchased items and report to the Owner any deficiencies or defects. Failure to so report shall constitute an acknowledgment that such items are fit and suitable for inclusion in the Work. All warranty and correction of the Work obligations under the Contract Documents shall also apply to any pre-purchased or direct-purchased items, unless the Contract Documents specifically provide otherwise.

3.7.9.3.5.2 The Construction Manager shall review any specified construction or installation procedure (including those recommended by any product manufacturer). The Construction Manager shall advise the Owner:

1. if the specified procedure deviates from acceptable construction practice;
2. if following the procedure will affect any warranties; or

... of any objections which the Construction Manager may have to the Selection of Trade Contractors and Suppliers procedure.

3.6 Selection of Trade Contractors and Suppliers; Bidding; Review and Award.

3.8.1.3.6.1 Preliminary Selection. — As soon as possible (and not later than sixty (60) days) after completion of design development for each portion of the Work to be put out for bids, the Construction Manager shall identify to the Owner, prospective Trade Contractors and Suppliers for the Project (i) by name and, (ii) respectively, by trade or material, equipment or supplies to be provided. Identification of a Trade Contractor or Supplier by the Construction Manager shall constitute a representation by the Construction Manager that, to the best of the Construction Manager’s knowledge at the time, following an appropriate inquiry, the potential Trade Contractor or Supplier is qualified to undertake the task for which it has been identified. The identification of possible Trade Contractors and Suppliers shall not require the Owner to investigate their qualifications, nor shall it preclude later objection to or rejection of any of them prior to bidding.

1. If the Owner has a reasonable objection to a Trade Contractor or Supplier identified by the Construction Manager, the Owner shall promptly notify the Construction Manager and the Construction Manager shall propose one or more others to whom the Owner has no reasonable objection.

2. The Construction Manager shall verify that all proposed Trade Contractors and Suppliers are properly licensed and sufficiently staffed to carry out their duties.

3.6.2 Bidding; Unbid Work. — The following provisions shall apply to so much bidding of the Work as is to be put out for bids:

1. With the Design Professional's assistance, the Construction Manager shall provide for the Owner's review the criteria for prequalification of bidders. The Construction Manager shall, with the assistance of the Design Professional, assemble and distribute all documents for
each bid package. The Construction Manager shall review the Drawings and Specifications and make recommendations as required to ensure that: (1) the Work of the Trade Contractors and Suppliers and any Owner-purchased materials is coordinated; (2) all requirements for the Work have been assigned to the appropriate Trade Contractor or Supplier; and (3) the likelihood of jurisdictional disputes has been minimized.

3.6.2.2 The Construction Manager shall solicit Trade Contractor and Supplier interest in the Work. Within the guidelines established by law or made known by the Owner to the Construction Manager, the Construction Manager shall recommend to the Owner the suggested list of pre-qualification qualified Trade Contractors and Suppliers for participation in the Work. The Construction Manager shall organize and conduct pre-bid conferences with potential bidders to familiarize them with bid documents and with any special circumstances, systems, materials or methods.

3.6.2.2.1 The Construction Manager shall provide for the Owner’s review of the criteria for prequalification of bidders and a list of prequalified bidders.

3.6.2.2.2 The Construction Manager shall review the bid climate for each bid package approximately thirty (30) days prior to the issuance of the package, including the pre-qualified bidders’ current workloads and labor and materials availability. The resulting suggested bid lists shall contain as many qualified bidders as are available and at minimum three bidders for each bid package.

3.6.3 Subsequently, the Construction Manager shall, with the Design Professional’s assistance, coordinate all questions and responses, maintain a bid “Request for Information” log, and issue appropriate Addenda.

3.6.4 The Construction Manager, Design Professional and the Owner shall establish a bidding schedule.

3.6.5 The Construction Manager shall, in consultation with the Owner and the Design Professional, develop and distribute all bid packages, pre-qualify bidders and provide information to prospective bidders, submit for the Owner’s review and approval their bid release recommendation for each bid package, which shall include a list of all prequalified bidders.

3.6.5.1 All general conditions shall be in the form of the General Conditions, modified (with the prior Approval of the Owner) by the Construction Manager in an insubstantial manner for particular trades and, when necessary, for consistency.
7. The Construction Manager shall, with the Design Professional's assistance, coordinate all questions and responses, maintain a bid “Request for Information” log, and issue appropriate Addenda.

3.8.3. Review and Award—The following provisions shall apply to the Work to be awarded.

1. 3.6.6—With the Design Professional’s assistance, and in the presence of the Owner, the Construction Manager shall receive and open the bids, unless the Owner determines to perform this task. The Owner shall be invited to attend all bid openings conducted by the Construction Manager. After bid opening, the Construction Manager shall prepare a trade-by-trade bid analysis, and make recommendations for award of contracts acceptance or rejection of bids. This shall include a detailed review of each bid to determine whether it is responsive, complete, reasonable, consistent and acceptable.

2. 3.6.6.1—With the Design Professional’s assistance, and in the presence of the Owner, the Construction Manager shall conduct a scope review meeting with the apparent lowest qualified bidder in each category (or the apparent two or more lowest qualified bidders if deemed appropriate by the Construction Manager or the Owner) to determine and verify that each bidder has satisfied the bidding requirements, and that each bidder understands the required scope and Contract Documents. The Owner shall be invited to attend all scope review meetings conducted by the Construction Manager.

3. The Construction Manager shall update the CCCS with bid results. If the bids cause, or threaten to cause, the Cost of the Work to exceed the lesser of the Fixed Limit of Construction Cost or Guaranteed Maximum Price, the Owner may seek remedy under the terms of Sections 3.7.6 and 3.7.7 above.

4. 3.6.6.2—The Construction Manager shall send written notice to the Owner advising whether or not the contract should be awarded. It is the Owner’s intention to have each bid package awarded to the apparent lowest qualified bidder. The Construction Manager shall submit to the Owner an award recommendation for each bid package that shall include detailed reasoning for its recommendations. The Owner shall have the right to approve all awards. The Construction Manager shall select successful bidders within the time parameters set forth in the Master Design and Construction Schedule or the Baseline Construction Schedule, whichever is applicable. If the Owner rejects a pre-qualified and apparently successful bidder who has been submitted for award by the Construction Manager, the Fixed Limit or the Guaranteed Maximum Price, whichever is in effect, will if necessary be adjusted to the extent of any increase in the Cost of the Work caused by the selection of another bidder.

3.6.7.1—The Construction Manager shall develop a post-bid report comparing pre-bid estimates to actual bids. If both one or more bids within a particular bid package exceed the estimate therefor, the Construction Manager shall at no additional cost to the Owner explore appropriate methods of reducing the costs of the Work to be performed pursuant to the bid. If negotiations are not successful, the Construction Manager shall at no additional cost to the Owner attempt to reduce the Cost of the Work for which excessive bids were received without reducing the quality of the Work. Any changes shall be reflected in a Change Order.

5. 3.6.8—The Construction Manager shall in its name issue letters of intent, award Trade Contracts and Supply Contracts, and issue notices to proceed.

PART 4. SERVICES DURING CONSTRUCTION

4.1 Field Staff.
4.1.1  **Field Staff.** The Construction Manager shall (i) maintain a competent and sufficient number of full-time field staff to perform the Services and coordinate, supervise and administer the Work and (ii) enforce strict discipline and good order among the employees of the members of the Construction Team. The Construction Manager shall not permit employment of unfit persons or persons not skilled in tasks assigned to them. To provide the uninterrupted, efficient and timely performance of the Work, the Construction Manager shall use its best efforts to avoid labor disputes of any kind.

4.2  **Superintendence.**

4.2.1  **Superintendence.** The Construction Manager shall keep on the Project at all times during the progress of the Work a competent, full time Superintendent and any necessary assistants, all satisfactory to the Design Professional and the Owner. The Superintendent shall be located at the Project site unless otherwise approved by the Owner. The Superintendent shall represent the Construction Manager and all directions, directives, notices and other communications given by or to the Superintendent shall be as binding as if given by or to the Construction Manager. The Superintendent shall remain on-site daily until full completion of the entire Work, including Punchlist Work.

4.3  **Cost Control During Construction.** The Construction Manager shall keep the Owner informed of the progress (in relation to the Baseline Construction Schedule), cost (in relation to the cost projections developed by the Construction Manager and the Owner’s budget) and quality of the Work. The frequency and level of detail shall be as reasonably required by the Owner by notification to the Construction Manager on or before the Commencement Date. The Construction Manager shall develop a system of cost and quality control for the Work, including continuous testing of installations, equipment and systems, monitoring of actual costs for activities in progress and estimates for uncompleted tasks and proposed changes.

4.3.1  **Cost Control During Construction.** The Construction Manager shall develop for the Owner’s approval and maintain computerized information management systems to monitor costs, schedules, quality, requests for information, Change Order status, submittals and all other information about the Work appropriately adaptable to such systems. Online access to the systems, or the systems’ up-to-date contents, shall be provided, if requested by the Owner.

4.3.2  **Cost Control During Construction.** The Construction Manager shall revise and refine the approved estimate of Construction Cost, monitor the cost of the Work in relation to the Guaranteed Maximum Price, incorporate approved changes as they occur, account for anticipated Change Orders and claims, monitor contingency amounts and develop and submit cash flow reports and forecasts as requested by the Owner, but not less often than monthly. The Construction Manager shall maintain cost accounting records on authorized Work performed under unit costs, additional Work performed on the basis of actual costs of labor and materials, or other Work requiring accounting records.

4.3.3  **Cost Control During Construction.** Utilizing standard, proprietary cost control software, the Construction Manager shall develop an account structure for the Owner’s approval and shall monitor construction and other Work-related elements of the Construction Cost for the Owner. The Construction Manager shall monitor the schedule of the Work in relation to the approved Construction Schedule, as detailed in General Conditions Section 4.9, incorporate approved changes as they occur and account for anticipated Change Orders, weather and other conditions which may affect the schedule.

4.4  **Reports and Logs; Documents and Samples at the Project Site.**

4.4.1  **Reports and Logs; Documents and Samples at the Project Site.** The Construction Manager shall record the progress of the Work and shall submit monthly written reports to the Owner and the Design Professional including: (a) information on each Trade Contractor’s Work, as well as the entire Work; (b) a materials report, including a complete list of Suppliers and fabricators, items to be purchased, time required for fabrication, and the scheduled delivery dates for each item to be purchased; (c) percentages of completion and the number and amount of Change Orders covering the
cost; (d) current Construction Cost-versus-Project budget, including committed costs and estimated future costs, compared with the Guaranteed Maximum Price; (e) status of the Baseline Construction Schedule; (f) work accomplished; (g) problems encountered; (g) safety, quality and other similar and relevant data as the Owner may require; and (h) requests for information or interpretation. The Construction Manager shall make the reports and logs available to the Owner and the Design Professional anytime upon request. The Construction Manager shall conduct information meetings for user groups and other Owner personnel at reasonable intervals as requested by the Owner to provide an overall update on the progress of the Work.

1 4.4.1 The Construction Manager shall provide reports on a monthly basis showing budgets, committed amounts, Change Orders, contingencies, estimated cost to complete, variances between actual and estimated costs, and payments for line items in the account structure. The Construction Manager shall advise the Design Professional and the Owner promptly whenever projected costs exceed budgets or estimates. The Owner shall provide the Construction Manager with summary totals for all line items not directly administered by the Construction Manager.

2 4.4.2 The Construction Manager shall keep and maintain a daily log containing a record of weather, Trade Contractors working on the Project Site, number of workers organized by trades, Work accomplished, problems encountered, daily log that shall be made available online and available for downloading for the Owner and the Design Professional. The log shall contain the following items and such other similar relevant data as the Owner or the Design Professional may reasonably require. The log shall be available for inspection and copying by the Owner and the Design Professional.

(a) a record of the daily temperature and weather;
(b) 4.4.2.1 The Construction Manager shall keep and forward a report of daily progress to the Design Professional and the Owner. The report shall include, but not be limited to, the number of workers listed by trade and/or Trade Contractor or Subcontractor on the Project, indicating where on the Project each was working and what Work activity was performed. The report will also address and record the delivery of major materials and equipment to the site, accidents of any nature and the severity of each occurring on the Project, problems encountered, the daily temperature and weather, visitors to the site, inspectors, testing agencies or other authorities on the Project site, and other similar relevant data as the Owner or the Design Professional may reasonably require. The Construction Manager's daily progress report will also note any variances between the requirements of the Contract Documents and the actual construction of the Work.

4.4.3 The Construction Manager shall maintain a daily log of all construction activities and

(c) a record of the delivery of major materials and equipment to the site;
(d) a list of visitors to the site;
(e) accidents of any nature and the severity of each occurring on the Project;
(f) inspectors, testing agencies or other authorities on the Project site;
(g) problems encountered;
(h) a photographic record of the Work's progress, and
(i) any variances between the requirements of the Contract Documents and the actual construction of the Work.
4.4.4—The Construction Manager shall maintain a log describing all requests for information or interpretation, including the date of the request, the date of its transmission to the Design Professional, the date the Design Professional’s response was received, and the date that response was transmitted to the maker of the request. Copies of all requests for information or interpretation shall be sent to the Owner at the same time they are sent to the Design Professional. The parties wish to avoid unnecessary requests for information or interpretation to the Design Professional. The Construction Manager shall review and evaluate any request for either information or interpretation received from any member of the Construction Team. If the Construction Manager believes it was made in bad faith, it shall notify the Owner.

4.5 Personnel.

4.5.1 Except as hereinafter provided, the Construction Manager shall render its Services and cause the Work to be staffed under this Agreement substantially in accordance with the Work staffing plan included in the Schedule of Project Details (Exhibit D). The Staffing Plan shall include the names of each person staffing the Work and the amount of time each staff person will be dedicated to the Work. The Construction Manager shall neither permit deviation from the Staffing Plan in any material fashion nor increase or decrease the staff performing or supervising the Work without first obtaining the prior written consent of the Owner in each instance, except that (i) minor changes in staff which do not involve Key People (as defined in Section 4.5.1.1), may be made and (ii) increased staffing necessary or appropriate to assure timely and proper performance of the Work in accordance with the Contract Documents shall be made without the prior written consent of the Owner, as a result of the Construction Manager’s failure to properly perform its Services under the Agreement, then the services of such increased staff shall be provided by the Construction Manager at its expense, without recovery from the Owner, whether under the Guaranteed Maximum Price, the use of any contingency claim, or otherwise, as a result of such change. The Construction Manager shall be responsible for all damages and other liabilities which result from the Construction Manager’s failure to properly staff the Work in accordance with the Staffing Plan.

1. The Construction Manager agrees that certain highly qualified person(s) have been designated in the Staffing Plan or the Schedule of Project Details as “Key People”. When the Key People are designated as “full-time” on the Staffing Plan, they shall devote all of their working time to the Project. All computations and other work performed by the employees of the Construction Manager shall be adequately supervised by one or more of the Key People.

2. The Construction Manager agrees that it shall assign Key Person(s), including those people described in Section 4.5.1.2 below, to its performance of this Agreement (the “Key People”), as approved by the Owner, as set forth in the Staffing Plan attached hereto; and that the Key People shall devote all of their time as necessary to the Project as may be appropriate to and consistent with the full and timely performance of the Contract Documents by the Construction Manager. Key People are principals and employees of the Construction Manager that the Owner desires to be and remain assigned to the Project. The Construction Manager agrees that the Key People shall not be removed from their responsibilities without the prior written consent of the Owner, except in the event of death, disability or departure from the employment of the Construction Manager. All necessary replacement Key People shall have qualifications and experience similar to their predecessors and shall be subject to the Owner’s approval. All computations and other work performed by the employees of the Construction Manager shall be adequately supervised by one or more of the Key People. If the Owner reasonably determines that any of the Construction Manager’s employees, including the Key People, are not performing the job satisfactorily working in a harmonious manner with the Owner’s representatives, the Owner shall have the right to direct that such individuals be replaced. If a replacement for one of the Construction Manager’s employees is necessary, (i) the replacement shall have qualifications and experience similar to their predecessor, (ii) the Construction Manager shall provide the Owner with
resumés of possible replacements, and (iii) the Owner shall have the opportunity to interview any such replacement candidates, and (iv) the candidate shall be subject to the Owner's approval.

4.5.2 The Construction Manager's designated Senior Project Manager shall devote substantially his full attention to the Project from the date designated on Exhibit P until Substantial Completion. The Construction Manager's General Superintendent for the Project shall devote his full attention to the Project from the date designated if the Construction Manager, after approval of the Owner, replaces any person included in the Staffing Plan included in the Schedule of Project Details until final project closeout. 4.5.3 The Construction Manager shall cooperate with the Owner to identify any key Trade Contractor personnel at the time bid packages are developed, with personnel having a lower rate of compensation, there may, at the option of the Owner, be a proportionate decrease in the Construction Manager's personnel charges.

4.6 Governing Terms in Addition to Agreement.

4.6.1 General Conditions. The Construction Manager's Services during construction shall otherwise be governed by the "General Conditions Applicable to Projects Where the Owner has Retained the Services of a Construction Manager".

PART 5 POST-CONSTRUCTION SERVICES

5.1 Post-Construction Phase.

5.1.1 Post-Construction Phase. The Post-Construction phase will commence upon Substantial Completion and shall extend to Final Completion and close-out of all contracts (the "Work Close-out").

5.2 Final Completion Certificate.

5.2 Final Completion Certificate. The Construction Manager shall review the Trade Contractors' Contract Documents, secure and transmit to the Design Professional Owner all required guarantees, warranties, affidavits, releases, bonds, waivers, insurance certificates, consents of sureties, etc., and shall sign off on a Final Completion certificate ("Final Completion Certificate") in a form acceptable to the Owner. The Trade Contractors' Final Payment applications shall also be included with the close-out documents to the Owner, after the Design Professional's review.

5.3 Close-Out.

5.3.1 Close-Out. The Construction Manager shall provide services to resolve any outstanding claims against the Owner by any member of the Construction Team or by anyone else as a result of any act or omission of any member of the Construction Team and to close-out contracts.

5.4 Warranties.

5.4.1 Warranties. The Construction Manager shall carefully coordinate all warranty and guaranty periods. All warranties, implied or expressed, must commence upon Substantial Completion and shall be for a minimum of one (1) year or as otherwise specified in the Design.

5.5 Trade Contractors and Suppliers.
5.5.1 Trade Contractors and Suppliers. The Construction Manager shall, following construction, provide any appropriate services described in Part F Article 6 of the General Conditions, which pertains to Trade Contractors and Suppliers.

5.6 Record Documents.

5.6.1 Record Documents. The Construction Manager shall for a period of seven (7) years after Final Completion retain and make available to the Owner upon request and without charge complete, legible and accurate copies of all Record Documents. The Construction Manager may charge a reasonable fee if the Owner requests reproduction of any such documents. After seven (7) years all Record Documents shall be returned to the Owner. The Construction Manager may retain a copy of the Contract Documents.

5.7 Training.

5.7.1 The Construction Manager shall provide training of all appropriate personnel employed by the Owner or the Owner’s agents in the installation, maintenance, operation, calibrations, and routine care of all equipment and systems provided and installed as part of the Work. Such training will be provided for multiple shifts, where applicable.

1. Separate training sessions shall be conducted for equipment/system operation and maintenance except when combining of these two (2) subjects is specifically allowed by the Owner.

2. The Construction Manager shall provide qualified, prepared instructors for all training plus all necessary material and equipment (training aids, audio visual equipment, seating, tables, etc.).

3. The Construction Manager shall provide factory-level maintenance training in system problem identification and resolution. This training should be aimed at providing the Owner with means to perform all corrective, scheduled and preventative maintenance.

5.7.2 All training shall be conducted on-site or, if conducted at a remote location, travel and expenses for Owner’s personnel shall be reimbursed to the Owner by the Construction Manager.

5.7.3 Training shall be conducted during the period described in the Schedule of Project Details.

5.7.4 For each training session, the Construction Manager shall submit a training plan for review. The plans shall include proposed dates/times/durations of training sessions, suggested class size/attendees, proposed locations, session objectives and an outline of the training topics to be presented. Training plans for all training sessions shall be submitted not later than the date set forth in the Schedule of Project Details. The Owner shall have the right to modify proposed training dates in conjunction with the Construction Manager to coordinate the schedule with availability of personnel and ongoing operations.

PART 6: ADDITIONAL SERVICES

6.1 Owner’s Witness; Recruiting and Training.

6.1.1 The following Additional Services shall be performed upon the written request of the Owner and shall be paid for as changes to the Work:
Preparing to serve or serving as a witness for the Owner in connection with any litigation or arbitration proceeding or other hearing after final contract close-out, and

Recruiting or training maintenance personnel, except as provided in the Contract Documents.

6.1.2. Notwithstanding anything to the contrary in this Agreement, the Owner shall not be responsible to pay and the Construction Manager shall not be entitled to receive compensation for any Additional Services if such services were required due to the fault of the Construction Manager, any member of the Construction Team, or the Construction Manager’s failure to perform in accordance with the terms of this Agreement.

PART 7. PART 7: GUARANTEED MAXIMUM PRICE

7.1 Guaranteed Maximum Price Proposal and Construction Time.

7.1.1 Forty-five (45) days after completion of design development Drawings for the Project (including architectural, mechanical and electrical design) reflecting the Owner’s comments, the Owner may, at any time, request and the Construction Manager shall thereafter promptly submit a proposed “Guaranteed Maximum Price” for the full scope of the Work, including all components, both a proposed “Guaranteed Maximum Price” and the Baseline Construction Schedule (which shall be deemed a part of the Guaranteed Maximum Price proposal), shall include all of the components identified in Section 7.2. The Owner may accept or reject the Guaranteed Maximum Price proposal.

1. If the Owner approves the Guaranteed Maximum Price proposal on or before the date specified in the proposal for such acceptance, the Guaranteed Maximum Price proposal shall be effective and shall become a part of this Agreement.

2. If the Owner rejects any Guaranteed Maximum Price proposal, but the Owner nevertheless elects to proceed with the Project, a Guaranteed Maximum Price submittal will be required sixty (60) days after the receipt of ninety percent (90%) of the bids.

3. If it is neither accepted nor rejected in accordance with Section 7.1.1.2, the Guaranteed Maximum Price proposal shall not be effective, but if requested by the Owner, it must be revised and resubmitted, with recalculations based upon the Owner’s direction, until it is accepted by the Owner. Alternatively, the Owner may elect to request another Guaranteed Maximum Price proposal at a later date.

4. The date on which the Guaranteed Maximum Price is accepted by the Owner shall not result in an extension of the Construction Time.

7.1.2 The Construction Manager acknowledges that the Drawings and Specifications are not complete, will be completed subsequent to execution of this Agreement and that completion may not occur until after the Work has commenced. The Construction Manager will participate in Owner/Design Professional meetings and will be given ample opportunity to ask questions to obtain a thorough understanding of the intended final product. As the Drawings and Specifications may not be finished at the time the Guaranteed Maximum Price proposal is prepared, the Construction Manager shall provide in the Guaranteed Maximum Price proposal consideration for further development of the Drawings and Specifications by the Design Professional (including addition of detail) that is consistent with the Contract Documents, including items reasonably inferable therefrom or from the Owner’s program (if provided to the Construction Manager), the Owner’s comments on the Design (if provided to the Construction Manager), and general industry standards. Hence, the Construction Manager agrees that no increase in the Guaranteed Maximum Price shall result from any of the foregoing. However, further development does not include such things as genuine material changes in scope, systems, kinds
and quality of materials, finishes or equipment, all of which, if required, shall be incorporated by Change Order as described in Part I Article 9 of the General Conditions, "Changes in the Work."

7.1.3—The Guaranteed Maximum Price shall include a contingency (the "Construction Manager’s Contingency").

7.1.3.1—The Construction Manager’s Contingency shall represent a sum available for the Construction Manager’s exclusive use to cover costs which are properly reimbursable as Cost of the Work, such as minor work that was not included in a prior bid package or work not indicated on the bid drawings, but the need for which should have reasonably been detected during a review of the design documents, but not the basis for a Change Order and which did not result from or arise out of or in connection with a breach by the Construction Manager of the standard of care set forth in Section 2.2 above. After the Guaranteed Maximum Price has been established, any savings in bid packages over the estimate therefor shall accrue to the Construction Manager’s Contingency. (Before a Guaranteed Maximum Price is established, any savings in bid packages over the estimates established therefor by the Owner in consultation with the Construction Manager shall accrue to an Owner’s contingency, which shall be available for the Owner’s use in its sole discretion.) All bid packages and any savings shall be clearly tracked and reported to the Owner on a monthly basis. The use of the Construction Manager’s Contingency shall be reviewed on a monthly basis with the Owner.

7.1.3.2—Upon Final Completion of the Work, any unused portion of the require prior written concurrence by the Owner for any item. In addition, a monthly report summarizing and detailing all of the Construction Manager’s Contingency utilization shall revert back be issued to the Owner.

7.2 Basis of Guaranteed Maximum Price

7.2.1—Basis of Guaranteed Maximum Price. The Construction Manager shall include with the Guaranteed Maximum Price proposal a written statement of its basis, which shall include:

1. A list of the Drawings and Specifications, including all Addenda thereto and the other Contract Documents, which were used in preparation of the Guaranteed Maximum Price proposal.

2. If allowed by the Owner, a list of allowances and a statement of their basis, including all assumptions. No cost for anticipated allowances shall be included in the Guaranteed Maximum Price. It shall instead be carried as an Owner’s set-aside outside of the Guaranteed Maximum Price.

3. A list of the clarifications and assumptions made by the Construction Manager in the preparation of the Guaranteed Maximum Price proposal to supplement the information contained in the Drawings and Specifications.

4. The proposed Guaranteed Maximum Price proposal, including a statement of the estimated Cost of the Work, organized by proposed bid package trade categories, allowances, contingency, and other change orders, general conditions items and the fee that comprise the Guaranteed Maximum Price.

5. The Baseline Construction Schedule depicting the Work and the Date of Substantial Completion upon which the proposed Guaranteed Maximum Price proposal is based, and from which, subject to the Contract Documents, liquidated damages shall be measured.

6. The costs for permits, anticipated tests, inspections, and other similar costs associated with the Work shall not be included in the Guaranteed Maximum Price, but shall instead be carried as an Owner’s set-aside outside of the Guaranteed Maximum Price.
7.3 Guaranteed Maximum Price Review and Acceptance.

7.3.1 The Construction Manager shall meet with the Owner and Design Professional to review the Guaranteed Maximum Price proposal and the written statement of its basis, including all assumptions. If the Owner or Design Professional discovers any inconsistencies or inaccuracies in the information presented, they shall promptly notify the Construction Manager, who shall make appropriate adjustments to the Guaranteed Maximum Price proposal, its basis or both.

7.2.1 If the Owner accepts the Guaranteed Maximum Price proposal in writing on or before the date specified in the proposal for such acceptance, the Guaranteed Maximum Price proposal shall be effective and shall become a part of this Agreement. Otherwise, the Guaranteed Maximum Price proposal shall not be effective.

7.2.2 Upon acceptance by the Owner of the Guaranteed Maximum Price proposal, the Guaranteed Maximum Price, and its basis shall be set forth in a Modification. The Guaranteed Maximum Price shall be subject to additions and deductions by Change Order or Construction Change Directive, as set forth in Part I Article 9 of the General Conditions, "Changes in the Work."

7.4 Unused Portion of Guaranteed Maximum Price.

7.4.1 Upon Final Completion of the Work, any unused portion of the Guaranteed Maximum Price, other than the Construction Manager's fee and personnel charges, shall revert back to the Owner through reduction of the Guaranteed Maximum Price by Change Order.

PART 8. PART 8: PAYMENT TO THE CONSTRUCTION MANAGER

8.1 Payment of Construction Cost.

8.1.1 Construction Cost. The Owner shall pay the Construction Manager, as Construction Manager’s sole remuneration in connection with the Project, the Construction Cost.

Manager's sole remuneration in connection with the Project, the Construction Cost.

8.1.1. "Construction Cost" means the Cost of the Work, plus the Construction Manager’s Fee, but in no event more than the Guaranteed Maximum Price. Unless the context of the applicable provision provides to the contrary, wherever in this Agreement or the General Conditions reference is made to costs to be borne by the Construction Manager, such costs shall be reimbursable to the Construction Manager, subject to the Guaranteed Maximum Price, to the extent allowable under this Part 8.

8.1.2 The Construction Manager shall neither solicit nor accept any kickback or improper fee, payment, or benefit of any kind in connection with the Project from anyone.

8.2 Cost of The Work. The "Cost of the Work" means reasonable and actual expenditures necessarily incurred by the Construction Manager in the proper performance of the Work, without markup. Such costs shall be at rates not higher than those customarily paid at the place of the Project except with prior consent of the Owner. The Cost of the Work shall include only the items set forth below:

8.2.1 Construction Manager's Personnel Charges. The "Construction Manager's Personnel Charges" which are the amounts to be paid to the Construction Manager as reimbursement for its supervisory and administrative personnel. The staffing of such personnel shall be in accordance with the Schedule of Project Details, as it may be amended from time to time with approval from the Owner. Subject to paragraph 8.2.1.1 below, the Construction Manager's Personnel Charges shall be the lump sum amounts stated in the Schedule of project Details, regardless of whether the actual cost is greater or less.
8.2.1.1 The Construction Manager will not be entitled to be paid for Construction Manager's Personnel Charges in excess of the amounts set forth in the Schedule of Project Details, unless (i) the Baseline Construction Schedule as approved by the Owner shows a Date of Substantial Completion for the Work later than the date shown in the Schedule of Project Details, or (ii) there is a change in either (a) the scope of the Work pursuant to Part I of the General Conditions, or (b) the sequencing of Project elements, that requires additional staffing beyond that reflected in the Schedule of Project Details. In either such case, the parties will negotiate an appropriate adjustment to the Construction Manager's Personnel Charges, or, at the option of the Owner, they will be calculated in the manner set forth in the succeeding paragraphs.

8.2.1.1.1 Where an exception to Section 8.2.1.1 applies and the Owner wishes to utilize a calculation method, the “Construction Manager's Personnel Charges” shall be expressed as a cost per hour determined separately per employee, based upon the actual number of hours each qualifying employee devotes to the Work, determined by calculating the “Job Charge Rate” and the “Permitted Fringe Benefit Rate” in accordance with the following paragraph. Qualifying employees are the Construction Manager’s supervisory and administrative personnel (i) listed the Schedule of Project Details, and any others later approved by the Owner, who perform a portion of their duties away from the Project Site; (ii) stationed at the Project Site with the Owner’s agreement; or (iii) engaged at factories, workshops or on the road in expediting the production or transportation of materials or equipment required for the Work.

8.2.1.1.2 The “Job Charge Rate” is the individual employee’s base compensation plus applicable supplemental compensation, vehicle allowance, and mileage reimbursement, divided by annual hours worked (available hours less holidays, vacation, sick/personal time, and other time off). To the Job Charge Rate will be added the “Permitted Fringe Benefit Rate,” which includes and is limited to social security taxes, unemployment taxes, health and welfare, retirement, workers compensation, and single business tax. The foregoing Rates will be based on actual costs for the employee or, where customary and appropriate, standard costs, consistently applied, that are derived from reasonable apportionment or projection of actual costs.

8.2.1.1.3 The Job Charge Rate and Permitted Fringe Benefit Rate applicable to a given employee, with supporting detail, shall be disclosed in writing and approved by the Owner before the Construction Manager is permitted to bill for the time of such employee. Increases in an employee’s Job Charge Rate or Permitted Fringe Benefit Rate require similar approval from the Owner. Approvals required of the Owner pursuant to this section will not be unreasonably withheld.

8.2.2 Trade Contract Costs. Payments made by the Construction Manager to Trade Contractors in accordance with the requirements of the Trade Contracts, including payment and performance bonds, if any.

8.2.3 Costs Of Materials And Equipment Incorporated In The Completed Construction.

1 Costs, including transportation, but less all available discounts, rebates, allowances and the like, of materials and equipment incorporated or, to the extent permitted by the Agreement, to be incorporated into the Work and included in the Guaranteed Maximum Price.

2 Costs of materials described in the preceding section in excess of those actually installed but required to provide reasonable allowance for waste and for spoilage that in any event shall not exceed what is considered a customary allowance. Unused excess materials, if any, shall be handed over to the Owner at the completion of the Work (or upon completion of the specific aspect of the Work, if spoilage or a decrease in the market value is a consideration) or, at the Owner’s option, shall be sold by the Construction Manager; amounts realized, if any, from such
sales shall be credited to the Owner as a deduction from the Cost of the Work.

8.2.4 Costs Of Other Materials And Equipment, Temporary Facilities And Related Items (General Condition Items).

1. Reasonable costs, including transportation, installation, maintenance, dismantling and removal of materials, supplies, temporary facilities, machinery, equipment, and hand tools not customarily owned by the construction workers, which are provided by the Construction Manager at the site and fully consumed in the performance of the Work, and cost less salvage value on such items if not fully consumed, whether sold to others or retained by the Construction Manager. If there is salvage value, the Construction Manager shall use its best efforts to provide the Owner with a savings in the Cost of the Work by selling the items. If such items are retained by the Construction Manager, the Cost of the Work shall be reduced by fair market value of the item that has salvage value. Cost for items previously used by the Construction Manager shall mean fair market value.

2. Reasonable rental charges for temporary facilities, machinery, equipment, and hand tools not customarily owned by the construction workers, which are provided by the Construction Manager at the site, whether rented from the Construction Manager or others, and costs of transportation, installation, minor repairs and replacements, dismantling and removal thereof. Rates and quantities of equipment rented shall be subject to the Owner’s prior approval.

3. Reasonable costs of removal of debris from the site.

4. Reasonable reproduction costs, costs of telegrams, facsimile transmissions and long-distance telephone calls, postage and express delivery charges, telephone service at the site and reasonable petty cash expenses of the site office.

5. That portion of the reasonable travel and subsistence expenses of the Construction Manager’s personnel incurred while traveling away from the Project Site in discharge of duties connected with the Work, all of which must be pre-approved in writing.

8.2.5 Miscellaneous Costs (General Condition Items).

1. That portion of reasonable premiums for insurance and bonds directly attributable to this Agreement. The Construction Manager’s insurance shall be invoiced at the rate set forth in the Schedule of Project Details.

2. Sales, use or similar taxes imposed by a governmental authority which are related to the Work and for which the Construction Manager is liable.

3. Fees and assessments for any permits, licenses and inspections for which the Construction Manager is required by the Contract Documents to pay (except those costs which arise as a result of the Construction Manager’s failure to proceed in accordance with the Standard of Care applicable to this Agreement or nonconforming Work, in which case, such costs shall be paid by Construction Manager and not reimbursed by the Owner as an element of the Cost of the Work).

4. Reasonable fees of testing laboratories for tests required by the Contract Documents, except those related to nonconforming Work.

5. Royalties and license fees paid with the prior written approval of the Owner for the use of a particular design, process or product required by the Contract Documents.
Owner.

6. Technology costs as agreed between the Construction Manager and the

7. Legal expenses incurred in excess of those required for the
   Construction Manager to perform its routine duties under the Agreement and which are incurred solely
   for the benefit of the Project and are approved in advance by the Owner (which approval will not be
   unreasonably withheld, delayed or conditioned).

8.2.6 Other Costs.

1. Other costs incurred in the performance of the Work if and to the
   extent approved in advance in writing by the Owner.

8.2.7 Emergencies And Repairs To Damaged Or Nonconforming Work. The Cost
   of the Work shall also include costs described above which are incurred by the Construction Manager
   in taking action to prevent threatened damage, injury or loss in case of an emergency affecting
   the safety of persons and property, as provided in the Agreement.

8.2.8 Costs Not To Be Reimbursed. The Cost of the Work shall not include:

1. Salaries and other compensation of the Construction
   Manager’s personnel stationed at the Construction Manager’s principal office or places other than the
   Project Site, except as specifically permitted in Sections 8.2.1 and 8.2.1.1.1 above.

2. Expenses of the Construction Manager’s principal office and offices at
   places other than the Project Site.

3. Overhead and general expenses.

4. The Construction Manager’s capital expenses, including interest on
   the
   Construction Manager’s capital employed for the Work.

5. Rental costs of machinery and equipment, except as specifically
   provided above in Section 8.2.4.2.

6. Costs due to the negligence of any member of the Construction Team
   or to the failure of the Construction Manager to fulfill responsibility to the Owner set forth in the
   Agreement. Costs incurred by any member of the Construction Team as a result of the negligence of
   any such parties or of anyone for whose acts any of them may be liable, including but not limited to,
   the costs of correction of defective or non-conforming Work, disposal of materials and equipment wrongly
   supplied, or making good any damage to property, subject to the waiver of subrogation rights.
   (However, the costs described in this Section 8.2.8.6 may be paid out of available Construction
   Manager’s Contingency if (i) the cost did not result from the failure of the Construction Manager to
   abide by the Standard of Care assigned to it in this Agreement and (ii) the Construction Manager has
   not been able to recover the cost from the responsible party after using its best efforts [at its expense
   without reimbursement] and exhausting all available remedies.)

through 8.2.8.

7. Any cost not specifically and expressly described above in Sections 8.2.1

exceeded.
.8 Costs which would cause the Guaranteed Maximum Price to be increased.

.9 Losses and expenses sustained by any member of the Construction Team if such losses or expenses arise out of the infidelity or dishonesty on the part of one of their employees.

.10 Losses and expenses not covered by insurance, if Construction Manager shall fail to obtain and/or maintain in effect the insurance required by the Contract Documents, and the insurance deductibles on the Construction Manager’s liability and worker’s compensation insurance.

.11 Provided that the Owner has paid the Construction Manager all amounts then properly due and payable under this Agreement, the Cost of the Work shall not include any sums spent or costs incurred by the Construction Manager, or for which the Construction Manager is liable or obligated, in connection with any construction liens filed or served by any member of the Construction Team because of the Construction Manager’s failure or refusal to pay any such member, whether or not any such failure or refusal is wrongful or as a result of a bona fide dispute between the Construction Manager and any such member.

.12 Other costs, expenses and losses which under the Agreement are not recoverable.

8.3 Construction Manager’s Fee. The Construction Manager’s Fee shall be as set forth in the Schedule of Project Details and shall be applied to all costs except for Construction Manager personnel and fees.

8.2 Construction Manager’s Fee.

8.2.1 The amount of the Construction Manager’s Fee is set forth in the Schedule of Project Details. For changes in the Fixed Limit or Guaranteed Maximum Price, not covered by Sections 3.7.6 and 3.7.7 included herein, that are required due to Owner change to the original scope included in this Agreement or for Design Professional error and omissions, the Construction Manager will be entitled to additional fee only in accordance with the Schedule of Project Details, Item 5a. No additional Construction Manager fee shall be allowed for any payments in satisfaction and resolution of claims or disputes.

8.3 Payment of Construction Cost.

8.3.1 8.4 Payment of Construction Cost. The Construction Cost will be paid monthly as expenses are incurred in accordance with Article 12 of the General Conditions. No retainage will be held on the Construction Manager’s Personnel Costs Charges or “General Conditions Costs” (those costs described in Sections 8.2.2 and 8.2.5 and 8.2.6 above). The Construction Manager’s Fee for Pre-Construction Phase Services shall be billed and paid monthly in equal installments as set forth in the Schedule of Project Details. The Construction Manager’s Fee for Construction Phase Services shall be billed and paid monthly in proportion to the Cost of the Work on which it is based.

8.4 General Conditions Costs.

8.5 General Conditions Costs. The Construction Manager shall include in the Applications for Payment it submits to the Owner detailed statements of General Conditions Costs, as set forth and approved by the Owner in the Schedule of Project Details and described in Section 2.10.6 above, itemized by category and amount, documented with receipts, and shall highlight the items in expense reports if combined with non-reimbursable expenses. Any revisions to General Conditions
Costs requiring expenditures in excess of Five Thousand Dollars ($5,000) per each separate occasion shall require written approval of the Owner (or, when so indicated by the Owner, oral approval from the Owner's authorized representative, provided that each such oral approval shall be confirmed in writing). The Owner, at its option, may establish reasonable aggregate limits for any General Conditions Costs which shall only be exceeded with prior written approval by item as listed in the Schedule of Project Details shall require prior written approval of the Owner.

8.5 8.6 Trade Payment Breakdown.

8.5.1 8.6.1 The Construction Manager shall cause each Trade Contractor to prepare a trade payment breakdown for the Work for which it is responsible, and such breakdown shall be submitted on a uniform standardized form approved by the Owner. The form shall be divided in detail sufficient to exhibit areas, floors and/or sections of the Work, and/or by convenient units and shall be updated as required by the Owner as necessary to reflect (1) description of Work (listing labor and material separately), (2) total value, (3) percent of the Work completed to date, (4) value of Work completed to date, (5) percent of previous amount billed, (6) previous amount billed, and (7) current percent complete. Any trade breakdown which fails to include sufficient detail to verify its accuracy, is unbalanced or exhibits "front-end loading" of the value of the Work shall be rejected. If a trade breakdown had been initially approved and subsequently used, but later found improper for any reason, sufficient funds shall be withheld from future Applications for Payment to ensure an adequate reserve (exclusive of normal retainage) to complete the Work.

8.6 Discounts.

8.6.1 8.7 Discounts. Trade discounts, rebates and refunds, and returns from sale of surplus materials and equipment shall accrue to the Owner to the extent the Owner makes funds available in a manner that allows such discounts, rebates and returns to be obtained, and the Construction Manager shall make provisions so that they can be secured. All items paid for by the Owner which are not consumed shall be turned over (or title transferred) to the Owner upon Final Completion. To the extent such items are being billed to the Owner on the basis of cost, the Construction Manager shall cause all Trade Contractors and Suppliers, and those working under them members of the Construction Team to take advantage of all available discounts, rebates and the like and pass that advantage fully on to the Owner.

PART 9: MISCELLANEOUS PROVISIONS

9.1 Liquidated Damages; Waiver of Consequential Damages.

9.1.1 (a) If, in the Schedule of Project Details, the parties (i) agree that the damages which the Owner will sustain as a result of a failure to meet the date of Substantial Completion set forth in the Baseline Construction Schedule are difficult or impossible to determine with certainty and, therefore, have (ii) in good faith estimated as fair compensation (and not as a penalty) "Liquidated Damages" to be based upon the actual date Substantial Completion is achieved, then Liquidated Damages shall apply.

If Liquidated Damages apply and Substantial Completion occurs later than the Substantial Completion date established in the Baseline Construction Schedule, which is not due to a Force Majeure Event, as defined in Section G3.1.3.27.3.3.2 of the General Conditions, liquidated damages shall be applied, reducing the Construction Manager's Fee, for each day of delay thereafter as set forth in the Schedule of Project Details.

9.1.2 (b) Notwithstanding If, but only if, Liquidated Damages apply, notwithstanding any other provision of this Agreement, the Construction Manager and the Owner waive all Claims
against each other the Construction Manager for consequential damages arising out of or relating to this Agreement. This mutual waiver includes the failure to achieve Substantial Completion on or before the date established therefor in the Construction Schedule.

9.1.3 If Liquidated Damages do not apply to a failure to achieve Substantial Completion on or before the date established therefor in the Construction Schedule, and in any event in the case of any other breach of the Agreement by the Construction Manager, then the Owner may pursue and enjoy any and all rights it may have at law or in equity, including Claims for direct, incidental, and consequential damages.

9.1.4 Damages notwithstanding any other provision of this Agreement, the Construction Manager waives all Claims against the Owner for consequential damages, including damages incurred by the Construction Manager for principal office expenses including the compensation of personnel stationed there, for losses of financing, business and reputation, general conditions and site expenses (except to the extent recovery is otherwise specifically permitted by this Agreement), and for loss of opportunity or profit—except anticipated profit arising directly from the Work, and otherwise recoverable under this Agreement.

This mutual waiver is applicable, without limitation, to all consequential damages due to either party’s termination of this Agreement.

9.2 Exhibits.

9.2 Exhibits Any exhibits attached hereto are hereby incorporated into this Agreement and are deemed a material part of this Agreement.

9.3 Notices.

9.3 Notices All notices required or permitted to be given by one party to the other under this Agreement shall be in writing and shall be sent by certified U.S. Mail, return receipt requested, or recognized overnight courier service, or shall be hand-delivered. Notices shall be effective upon the earlier of actual receipt or two (2) business days after posting or delivery to a courier, at the following addresses:

To the Owner:

The Regents of The University of Michigan
C/o Architecture, Engineering and Construction
326 East Hoover
Ann Arbor, Michigan 48109-1002

Attention: Director

To the Construction Manager:

As shown in the Schedule of Project Details

9.3.1 Either party may change its address for the purpose of receiving notices under this Agreement by written notice to the other party in the manner set forth above.

9.4 Relationship of the Parties.
9.4.1  Relationship of the Parties. Construction Manager agrees that its relationship with the Owner is one of an independent contractor, and that, except to the extent it is expressly permitted by this Agreement to do so, it will not act or represent that it is acting as an agent of the Owner or incur any obligation on the part of the Owner. The Construction Manager acknowledges that the Owner is not a partner or joint venturer of the Construction Manager and that the Construction Manager is not an employee or agent of the Owner.

9.5  Conflict of Interest.

9.5.1  The Construction Manager shall notify the Owner if at any time during the term of this Agreement, any actual or potential conflict exists between the interests of the Construction Manager and the Owner. The Owner shall be entitled to take reasonable steps to manage any such conflicts of interest, up to and including prohibition in appropriate circumstances. The Construction Manager will ensure that all members of the Construction Manager’s staff are made aware of and required to comply with this Part.

PART 10. REGENTAL APPROVAL

10.1  Approval Required.

10.1.1. Even though it may have been executed by all parties, this Agreement shall not be binding upon the Owner unless and until the Project has been approved by the Owner’s Board of Regents, if Regental approval is required for this Agreement.

10.2  Failure to Obtain Approval.

10.2.1. If the Construction Manager has been directed by the Owner to proceed with the preconstruction Services and approval of the Project is not obtained from the Owner’s Board of Regents, then the Owner shall direct the Construction Manager to stop Work, and the Owner shall pay the Construction Manager for all Services rendered prior to its being directed to stop Work.

IN WITNESS WHEREOF, this Agreement for Construction Management Services has been executed as of the date first written above.
